Conceptual Framework

Research Model Components

Independent Variables

Social Media Exposure, e-WOM, Influencer Credibility, Social Media Interaction, and Usage Frequency.

Dependent Variables

Purchase Intention and Impulsive Buying Behavior among modern digital consumers.

Core Assumption

Exposure to visual content and immense trust in influencers significantly reduces cognitive control.

Methodology & Data Collection

205

ACTIVE USERS SURVEYED

Target Demographics & Scaling

Participants are aged 18 and above, representing a highly diverse sample of young adult consumers navigating modern digital platforms.

A convenience sampling method was rigorously utilized via online questionnaires (Google Forms). Furthermore, all theoretical constructs were consistently measured using validated 5-point Likert scales.

Measurement Reliability (Analysis)

Measurement Scale	Number of Items	Cronbach's Alpha
Social Media Exposure	5	0.78
Electronic Word of Mouth (e-WOM)	5	0.81
Influencer Credibility	4	0.83
Social Media Interaction	3	0.80
Purchase Intention	5	0.85
Impulsive Buying Behavior	4	0.82

Correlation & Regression Data

- **Exposure (H1 & H3):** Significant positive correlation observed. Exposure explains 15.7% of the variance in buying behavior. $r = 0.397$, $p < 0.001$
- **Credibility (H2 & H4):** Influencer credibility is an exceptional predictor, explaining 17.8% of the variance. $r = 0.421$, $p < 0.001$
- **Synthesis:** The empirical data confirms that continuous exposure directly drives rapid, unplanned purchases.

Demographic Insights (Gender)

Behavioral Shifts (H7 & H8)

- Female participants reported significantly higher levels of total social media exposure. $p = 0.049$
- Female participants exhibited significantly higher impulsive buying behavior overall. $p < 0.001$

Platform Usage (H6)

- **TikTok:** Significantly higher usage specifically among female demographics. $p = 0.023$
- **Twitter & YouTube:** Statistically dominated by male users.
- **Instagram:** Universally adopted across all genders.

Strategic Implications

Modern office business

Leveraging Digital Trust

Social media acts as a powerful catalyst for consumption. The empirical evidence heavily suggests that higher exposure and perceived influencer credibility directly drive impulsive buying metrics across the board.

Recommendation: Brands targeting female demographics should fiercely prioritize credible influencer collaborations on visual-based platforms like TikTok and Instagram, capitalizing on susceptibility to hedonic shopping triggers.
